

[Flood Risk Assessment]

“Ambiental’s tenacity, expertise and attention to detail helped us to save time and money by ensuring that the authorities had all the information they required.”
Air BP

UK flood risk

Ambiental is a leading UK-based flood risk consultancy. Flooding is our business.

We operate nationwide assisting developers, architects, risk managers, energy providers and insurance companies to better understand and communicate flood risk.

Our team of hydrological modellers and flood risk consultants are highly experienced in the provision of comprehensive Flood Risk Assessment (FRA) reports, flood data and business continuity management plans.

Our unique approach to FRA is based on:
Unparalleled knowledge of flood risk issues and current legislation (PPS25/TAN15)

Key relationships with stakeholders including local authorities and the Environment Agency

Unique technology based on the latest data and our proprietary flood modelling software – Flowroute™

The benefits of our approach include:

- ✓ Reducing costs associated with planning delays and design changes
- ✓ Speeding up the planning process via improved communication with the Environment Agency and local authorities
- ✓ Improving the likelihood of securing planning permission
